  - Equity statement
    - Hiba sent an email to the people who put it together (we were always going through Hiba) summarizing what all the student representatives from the subcommittee on queer people had to say
    - Also stated a request for an edit to the wording that the UGE brought up
    - Got a response from the people who wrote it saying they would "try to change our minds" by giving us a list of other people/groups who have already endorsed it
      1. Also said the statement should be taken as a political tool to hold the university accountable, rather than as an academic or historical statement
      2. They also said they would not edit it because they already had a strong endorsement
    - So basically, we're not signing off on it, but hopefully when it comes out advocates can use it to hold McGill accountable in the future
